EDUCATION

Youngstown State University

Master of Science in Data Science and Statistics (GPA 4.0)

Youngstown, OH

Jan. 2025 - May 2026

Youngstown State University

Bachelor of Science in Computer Science, Minor in Mathematics (GPA: 4.0)

Youngstown, OH

Aug. 2021 - Dec. 2024

EXPERIENCE

Instructor of Record (Statistics)

Youngstown State University

Aug. 2025 - Present

Youngstown, OH

- Facilitated comprehensive instruction for **49 students over two consecutive semesters**, managing all lectures, exam design, and grading for an undergraduate statistics curriculum.
- Analyzed student performance trends and implemented changes leading to average grade improvements of 8.5%
- Provided on-demand technical mentorship for 49 students, resolving complex blockers in data analysis and hypothesis testing via daily correspondence.

Software Developer

Dev Youngstown

Jan. 2025 – Present

Remote

- Architected and deployed 3 full-stack MVPs from ideation to launch, securing early-stage validation for startup clients.
- Collaborated with 7 other engineers via Slack in a remote work environment, using Jira for collaboration.
- Built an efficient GitHub Actions CI/CD pipeline with Northflank webhooks and containerized deployments, maintaining 99.9% uptime for each startup.

Data Science Researcher

Youngstown State University

Jan. 2023 - Present

Youngstown, OH

- Utilized DynamoDB to view 63 terabytes of autonomous vehicle run data and analyze failure points.
- Created an ETL pipeline for more than 50,000 comments, identifying key business struggles for 300 locations.
- Hosted an interactive dashboard featuring sentiment analysis, and LLM-generated suggestions based on relevant comments using a small RAG pipeline.

Software Engineering Intern

NASA

Jun. 2023 – Aug. 2023

Cleveland, OH

- Utilized C++ and the Qt library to develop plugins servicing 70% of users for steady state data acquisition system, COBRA.
- Collaborated with engineering interns of different disciplines on a solar panel tracking challenge, won first place among 5 teams.
- Facilitated Agile development workflows via GitLab, conducting peer code reviews and maintaining 95%+ documentation coverage for the COBRA plugin architecture.

PROJECTS

League of Lookup | *Python, FastAPI, React, PostgreSQL, Docker, Prometheus, Grafana*

- Built an end-to-end full stack League of Legends statistics and recommendation application
- Monitored and observed the application using Prometheus and Grafana
- Ran a local instance on home server using Tailscale

FluentSign | *FastAPI, React, MongoDB*

- Developed a Machine Learning ASL Learning tool using mediapipe, opencv, sk-learn for hand sign recognition.
- Quickly iterated upon the app with a small team using React, FastAPI, PostgreSQL stack, winning **first prize** at University hackathon

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript, HTML/CSS, R, Bash

Frameworks / Libraries: React, Node.js, FastAPI, Django, pandas, numpy, sklearn, PyTorch

Developer Tools: Git, Docker, Github Actions, Kubernetes, VS Code, Terraform / OpenTofu, AWS, Jira, Bitbucket, Prometheus, Grafana

Databases: PostgreSQL, MongoDB, SQLite, Redis
